PROJECT EXPERIENCE

NoteHub URL 2026

Project description: Developed a full-featured NoteHub web application for using personal.

Tech stack: React, TanStack Query, Axios, Formik, Yup, CSS, REST API integration, Vercel deployment.

Role: Frontend Developer (solo project). Designed and implemented application architecture and UI components; integrated REST API with authenticated requests; managed server state with TanStack Query (queries, mutations, cache invalidation); built forms with validation using Formik and Yup; implemented pagination, search with debounce, modal windows via portals, and full TypeScript typing across components and services.

Hatynka Lapok URL 2025

Project description: team-based front-end web project focused on developing a responsive multi-page website .

Tech stack: HTML5, CSS3, JavaScript (ES6+), responsive design (Flexbox, media queries), GitHub

Role: Frontend Developer (team project). Developed and styled the footer component and contributed to overall UI consistency across pages. Participated in collaborative development workflow using GitHub: working with branches, pull requests, and code integration. Supported layout refinement, responsive adjustments, and cross-device testing. Contributed to debugging, UI polishing, and ensuring design consistency across the project.
